DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear by the recited claim language in claim 7 as to how the applicant obtains transmission in the shielding section by applying a total reflection coating. Claim 7 contradicts the functional language of base claim 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4,5 and 10 is rejected under 35 U.S.C. 102(b) as being anticipated by (JP 05-000390).

Figures 3 and 4 illustrate an aperture having a light transmitting section (203) surrounded by plates (204,205), made of copper, steel, brass or aluminum, for shaping a laser beam to a predetermined shape, where gas is blown into the vicinity of the aperture.

*claims 1-3 are rejected under 35 USC 102(b)
as being anticipated by 06164030. See the abstract.*

Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by (JP 8-111551).

Figure 1 illustrates an aperture for shaping a laser beam to a predetermined shape having a shielding section made of multiplayer dielectric material, which will reflect the undesired beam portion away from the optical path as shown in figure 2.

Allowable Subject Matter

Claims 1-3 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior arts alone or in combination discloses the structural combination of independent

claim 1, where heating means for heating the light transmitting section of a laser beam shaping aperture, is in the vicinity of the light shielding section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
